

Agenda

9.30 am - 17.30 pm | Corporate/NGO Exhibition

The world recognizes the growing consensus on the practicality, viability and sustainability of using Corporate Social Responsibility (CSR) practices and public private partnership (PPP) to address social, environmental and economic issues within a community. The private sector firms know of the necessity to contribute to the development of the country and that NGOs are needed as important partners, but both sectors need a platform to network and discuss what collaborative efforts are needed to sustain and encourage a successful and sustainable partnership.

This year, and in collaboration with the René Moawad Foundation (RMF), CSR LEBANON is providing 20 civil society organizations (CSOs) from the North and Akkar, a platform to present their projects and initiatives at the 6th CSR LEBANON FORUM. The NGO Exhibition will serve as a networking ground where knowledge can be transferred, partnerships forged, collaborations intensified, and engaged opportunities showcased. This cooperation was established to help CSOs in the North of Lebanon become more sustainable and enhance engagement of public private partnership – an intrinsic element of any CSR strategy.
